

CLOSURE TRAIL STUDY

Plainville • Southington • New Britain

Help Us Refine the Preferred Alignments!

Please join us for a Collaborative Workshop to review and discuss the characteristics of the Preliminary Preferred Alignments in Plainville and New Britain for the Gap Closure Trail Study. The meeting will begin with an open house where you can provide feedback on specific sections of the proposed trail. At 7pm there will be a presentation that provides an overview of the process used to narrow the alternatives into the Preferred Alignments. After the presentation there will be a question and answer period, followed by another opportunity to provide feedback in an open house setting. We want your feedback on the Preliminary Preferred Alignments! Your input will help the study team shape the final recommendations for the FHCT and CT **fastrak** connection.
